Product Manager and ex-founder with 5 years of experience building consumer apps, growth systems, analytics foundations, and workflow-heavy products across fintech, consumer commerce, and 0→1 startups.

Experience

Product Manager - [Pickup Coffee](#) via [Shuru](#) (Oct 2024 – Present)

- Launched in-app Delivery by integrating Pandago end-to-end; delivery now contributing 15% of app orders and approximately 9.6M Peso in monthly revenue.
- Led Mexico product launch end-to-end across Customer App, Barista App, and Backoffice, owning localization, market-specific user and store flows, payment readiness, integrations, and release planning.
- Built Pickup Coffee's product analytics foundation by leading CleverTap migration, event taxonomy, and A/B testing guidelines, enabling teams to track user journeys, campaign performance, feature adoption, and product impact.
- Ideated and launched Quests - a gamification feature driving 80K+ user engagements, 2.2K quest completions, and 1.3K reward claims. Orders per user increased by 17% increasing revenue by 5M Peso during the campaign.
- Built and launched Gift Cards as a new revenue lever, defining user journeys, redemption flows, and rollout strategy; generated additional sales of 120K Peso during the Christmas campaign.
- Reduced order-update SMS costs by approximately \$3K/month by shifting communication from SMS to push notifications, saving around \$36K/year while preserving customer communication coverage.
- Proactively identified and solved an unowned app-rating opportunity by launching a post-order rating nudge, improving the percentage of 5-star ratings by 5 percentage points in the first 30 days.
- Proactively identified an app-rating improvement opportunity by launching a post-order rating nudge; launched it and improved the % share of 5-star ratings from 83% to 90% and app ratings from 4.64 to 4.74 in 6 months.

Co-founder and Product Head - [Crewwork](#) (Dec 2023 – Sep 2024)

- Built an in-house Learning Management System to run live PM cohorts end-to-end, improving learner experience and reducing manual operating effort across cohort delivery, tracking, and communication.
- Scaled a bootstrapped cohort-based course to ₹3L revenue per batch while owning product, sales, operations, marketing, and customer feedback loops.
- Redesigned website and application funnel, driving 90% form completion and shifting 50% of enrollments to onboarding-led conversion instead of sales-call-led conversion.

Associate Product Manager - [Houseworks](#) (Jul 2022 – Dec 2023)

- Led end-to-end UI overhaul for an oncology EMR and patient portal, reducing patient-portal complaints by 15% through workflow, usability, and information-architecture improvements.
- Worked with healthcare users and internal teams to translate complex operational workflows into clearer product flows for clinical and patient-facing use cases.

Product Analyst - [Jar](#) (October 2021 – July 2022)

- Designed experiments across home-screen offers and nudges, improving home screen to first transaction conversion from 10% to 14%.
- Analyzed one-time gold purchase behavior and optimized recommended purchase amounts, improving conversion and average order value for the flow.
- Collaborated with the growth team to improve WoW retention by 20% using targeted push notification campaigns based on user behaviour.

Skills

Product Management: Product discovery, PRDs, roadmap prioritization, user journeys, feature ownership, stakeholder alignment, product launches

Growth & Consumer Behavior: Activation, retention, engagement loops, onboarding, lifecycle journeys, push notifications

Analytics & Experimentation: Funnel analysis, cohort analysis, A/B testing, event taxonomy, metric definition, experiment design, impact analysis

Workflow Systems: Internal tools, operational workflows, voucher/reward systems, location/store logic, delivery flows, release planning

AI & Prototyping: AI-assisted prototyping, rapid MVP building, workflow automation, product demos

Tools: CleverTap, Amplitude, SQL, Python, Metabase, Excel/Google Sheets, Jira, Figma, Slack

Education

National Institute of Technology, Kurukshetra

Bachelor of Technology, Mechanical Engineering (2017-2021)
